Figure 1 consists of 12 micrographs arranged vertically, showing the stages of chick embryo development. The labels on the left are: Fertilization, 1st cleavage, 2nd cleavage, 3rd cleavage, 4th cleavage, 5th cleavage, 6th cleavage, 7th cleavage, 8th cleavage, 9th cleavage, 10th cleavage, and Hatching. The images show the progression from a single cell to a fully formed embryo with visible features like the head, tail, and wing buds.
